

Cannabidiol (CBD) a naturally occurring plant compound found in the flower of cannabis, a plant with a rich history as a medicine going back thousands of years.

Cannabinoid: a class of diverse chemical compounds that acts on cannabinoid receptors (CB1/CB receptors) within the Endocannabinoid system.

Endocannabinoid system (ECS): a biological system composed of endogenous cannabinoids (endocannabinoids) that are involved in regulating a variety of physiological and cognitive processes.

Anandamide:

The word “anandamide” originates from the sanskrit “ananda,” which roughly translates to “bliss” or “joy,” an indication of the cannabinoid’s properties as a mood enhancer. Also called N-arachidonylethanolamide (AEA), anandamide interacts with the body’s CB receptors similarly to cannabinoids like THC. It’s a neurotransmitter and cannabinoid-receptor binding agent that functions as a signal messenger for CB receptors located in the body.

About US

Dwell CBD was started as a means to provide premium quality CBD and CBD-infused products with unmatched service and unparalleled commitment to our community.

Our commitment to providing world-class products and improved quality of life for people and animals is a passion for everyone at dwell, and we are committed to being good stewards of our natural resources to earn and retain the confidence our customers have placed in our company and products.

Our Mission

To provide our customers with the highest quality CBD & CBD-infused products available, while serving our community with a commitment and dedication to wellness for everyone!

CBD

wellness for life

Sexual Health is Important

There are numerous reasons why people choose to use CBD, rather than THC, for sex. The following are a few possible groups who may benefit most from this cannabinoid:

People with anxiety. One of the most common problems is feeling self-conscious with our body in general. CBD has been known to help people focus more on their personal connections.

People with acute or chronic pain. Living with any form of chronic pain can have a direct impact on your romantic life. For instance, a minor physical condition that slows your sexual response might cause anxiety to contribute to ED. Researchers have found that CBD helps with many potential causes of ED, particularly as it relates to physiological imbalances.

Feeling uninterested or struggling with reduced libido is far too common and often due to daily stress. It is not unusual for sexual desire to be lost which is often caused by complications in inhibition systems. CBD is known to reduce anxiousness and possibly improve intimate performance.

Relax to Get in the Mood

Pain, anxiety, convenience— are all very valid reasons why you might consider using CBD products for sex. Others who aren't experiencing issues may still choose to use CBD for its ability to relax the mind and body and is likely enhance nearly any sexual experience.

It's important to note there is no one-size-fits-all formula when it comes to using CBD for sex. CBD is likely to affect people differently depending on factors like their sex or body mass index. While it may boost one person's libido, it may not work for someone else.

It's not just the mental benefits of CBD that experts tout. There's another group of receptors in your endocannabinoid system that can reduce pain, making CBD an option for people who experience types of acute or chronic pain.

Topical CBD may help women who experience painful sexual intercourse due to dryness. CBD increases blood flow and sensation, which can help enhance pleasure for both parties.

The Arthritis Foundation published a "CBD Guidance for Adults with Arthritis" in which they reported the results of a survey and "Key Takeaways" reported "CBD may help with arthritis-related symptoms, such as pain, insomnia, and anxiety."

Dwell CBD products are all proudly grown and formulated in KY!

At dwell CBD™ we take the science of hemp-derived cbd and cbd-infused products very seriously. dwell CBD™ is not simply a brand; it's a lifestyle and a commitment to wellness, through enriched natural resources and a focus on purity.

Our culture is as simple and pure as the process we implement for our products. Clean, honest and dedicated team members will continue to be the face of dwell CBD™ - because they are your friends, neighbors and family, they are the people you know and trust, they are the people who care about your health and wellness for life. Welcome to the family!

dwell CBD™ operates under the Kentucky Department of Agriculture in association with producers and farmers - within section 7606 of the U.S. Farm Bill and the laws of the State of Kentucky.
